

## Patent Claims

1. Packaging for a cigar comprised of a hull (1), in whose inner space (2) the cigar is taken up (3), whereby the hull can be closed off with a sealing cover (4), thus characterized in that a cigar cutter (5) is arranged on the sealing cover (4).
2. Packaging according to claim 1, thus characterized in that the sealing cover (4) is connected to an open ended hull (8) on the top in whose inner space (7) the cigar cutter (5) is arranged.
3. Packaging according to claim 1 or 2, thus characterized in that the cigar cutter (5) is comprised of a ring shaped cutting blade (6, 12, 14).
4. Packaging according to claim 3, thus characterized in that the cutting blade (6) exhibits a circumferential, straight cutting edge (17).
5. Packaging according to claim 3, thus characterized in that the cutting blade (12) exhibits a wave shaped cutting edge (13).
6. Packaging according to claim 3, thus characterized in that the cutting blade (14) exhibits a zig-zag shaped cutting edge (15).
